	THE OAKMAN TRAIL - 2.1 MILES		
	THE AZALEA TRAIL - 1.5 MILES		
	THE HOLLOW CREEK TRAIL (HCT) - 5.0 MILES		
	LAKE ACCESS		

 **Woodside Perimeter Sidewalk - 7miles** - This lollypop shaped sidewalk trail is the best known and most frequently used trail for those who wish to walk in Woodside. It is within easy walking distance of most homes and portions of it are also used to tie in the nature trails. The stem of the lollypop is 1.0 miles and the loop is 6.0 miles.

 **The Village Trails** - The Villages at Woodside offers a variety of trails, businesses and amenities that are connected to Woodside by a paved and lighted 0.25 mile path from the Reserve Club parking area. There are many paved walking circular routes and a 1.5 mile perimeter nature trail that meanders through the nature terrain. Access via parking at P1 and P2.

 **The Reserve Park Oval - 0.25 miles** - This oval trail is a paved track in a lovely horticultural setting. Parking is located adjacent to the track, P3.

 **The Meadows Loop Trail - 0.6 miles** - This is a neighborhood nature trail that loops around the Meadows. The trail is a very flat dirt path and you can add another 0.2 miles by walking around the Meadows Park sidewalk. Access via parking near Meadows Park at P4.

 **The Creek Walk - 0.5 miles** - This is a short neighborhood walk located near Cottonwood Creek. This fairly flat circular trail is completely shaded and follows the Cottonwood Creek stream bed, crossing it in several places on wooden bridges. The trail has a walkout observation deck, small nature library beside the creek, and plaques distributed along the trail to identify the native trees and flora. There is also a well-marked pedestrian access point from the Woodside Perimeter Sidewalk. Parking is in the dead-end of Cottonwood Creek Lane, P5.

 **The Mill Road Trail - 0.75 miles** - This trail is a short 0.75 mile track that runs along the timbered area on the northeast side of the Hollow Creek land Preservation Area (HCLP). The trail eventually connects to the second loop of the Azalea Trail. Access to the trail is from the Trail Head Parking area.

 **The Oakman Trail - 2.1 miles** - This lollypop shaped trail travels through the wooded area between the 5th and 6th holes of the Reserve Golf Course, over the Oakman Lake dam, out to the sidewalk along Woodside Plantation Drive then back into the woods, across a zig-zag bridge, and back to the Trail Head Parking area. There are also two well-marked pedestrian access points from the Woodside Perimeter sidewalk. Access to the trail is from the Trail Head Parking area.

 **Azalea Trail - 1.5 miles** - This trail follows a common pathway shared by the Mill Road and Hollow Creek Trails. Signs point the way to each trail. The Azalea Trail is completely shaded in the summer and is named for a group of native azaleas located along a stream bed that the trail crosses. The trail is about 1.5 miles in and out, but don't let the length fool you as it is quite hilly and the two loops offer a good workout. Access to the trail is from the Trail Head Parking area.

 **The Hollow Creek Trail (HCT) - 5.0 miles** - This lollypop shaped trail is Woodside's longest and premier nature trail; so grab your walking stick and put on your hiking boots for some serious hiking. The trail more or less follows the perimeter of the HCLP. The trail starts at the Trail Head Parking area and leads you on a loop that can be walked in both directions and offers wooded areas, occasional views of the golf course, and the Anderson Pond Dam. Access to the trail is from the Trail Head Parking area and the Additional Hollow Creek Trail Parking area.
