

10/9/2024 Update

Chukker Creek gate remains closed to entry only. You can exit the gate. The part to repair has been ordered, updates to follow once the gate is open again.

If you had a barcode installed on your vehicle since Hurricane Helene, it will not work at East and Village Gates. The cellular data cards that transfer the barcode information to the gates were damaged and have to be replaced. Those have also been ordered and we will let you know once they are active.

We have met with Cold Creek and C&R to plan the next steps for clean-up. This will be taken in two Phases. The first phase will be to drop and leaning, broken trees that are dangerous and risk falling. That includes trees that have been submitted to the POA office that are on Common Areas. That will begin this week and we estimate that to take 2-3 weeks. Phase 2 will be hauling off the trees you see down on common areas and along roadsides. We do not have a time frame for that as yet.

We continue to communicate daily with The City of Aiken and as soon as we have updates regarding residential debris removal, we will communicate that to the community.

As a reminder, all previous emails are posted on the WPPPOA website as well as a list of tree vendors.
